

The Smart Operating System for Modern Communities

Connecting Residents, Security Guards, and Admins into one unified, real-time ecosystem.
Built with Expo SDK 55, React Native & Supabase.

98%

Faster Gate Entry

100%

Paperless Records

< 3s

Approval Latency

Residential Communities Suffer From Friction

Traditional society management leads to security gaps, delayed payments, and unorganized communication.

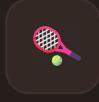

Gate Bottlenecks

Paper registers and endless phone calls cause long queues at entry gates and missed visitor approvals.

Billing Chaos

Treasurers spend hours tracking cash, cheques, and manual receipts for monthly maintenance dues.

Amenity Conflicts

Shared facilities like clubhouses or courts are booked verbally, leading to double bookings and confusion.

Scattered Alerts

Important announcements get buried in noisy WhatsApp groups, while complaints go untracked.

Resident App: Empowering Every Homeowner

1-Tap Gate Approvals, Pre-Approved Guest Passes & Integrated Digital Payments.

Instant 1-Tap Approvals:

Instant push notifications when guests or deliveries arrive at the gate.

Pre-Approved QR Passes:

Share WhatsApp QR passes for fast-track guest entry.

Razorpay Dues Integration:

Clear maintenance bills securely with instant digital receipting.

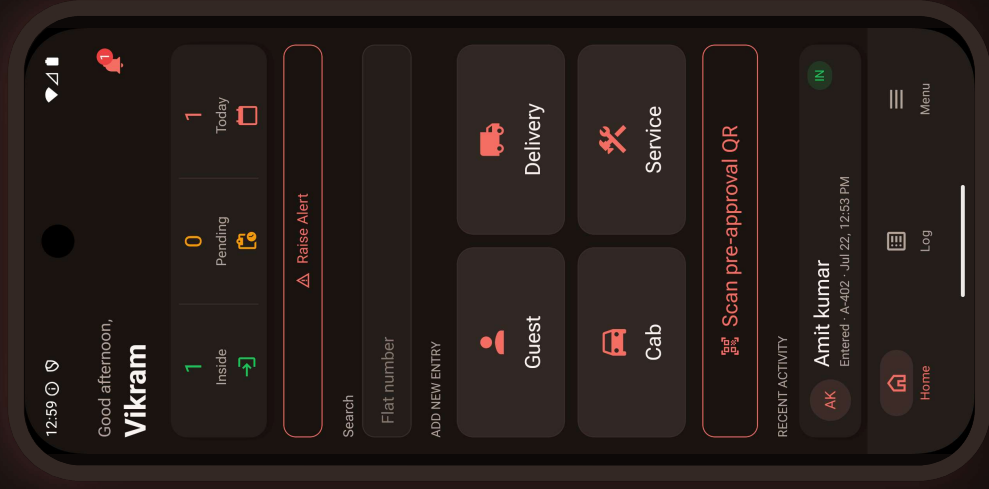

Slot Reservations:

Reserve clubhouse & sports facilities with live calendar availability.

Security Guard App: Lightweight Gate Control

Fast Visitor Registration, Camera QR Scanning & Real-Time Gate Sync.

Instant Visitor Logging:

Quick entry form for walk-in visitors and delivery agents.

QR Camera Scanner:

Scans guest pre-approval passes with atomic database verification.

Real-time Gate Feed:

Immediate visual confirmation when a resident approves entry.

Zero Paper Registers:

Eliminates physical logbooks for a 100% digital security gate.

Admin Dashboard: Complete Society Command

Automated Dues Generation, Notices, Interactive Polls & Grievance Tracking.

Automated Monthly Billing:

Generate dues cycles across all flats in a single click.

Notices & Interactive Polls:

Broadcast community updates and conduct resident voting.

Grievance Resolution:

Track, assign, and resolve resident complaint tickets transparently.

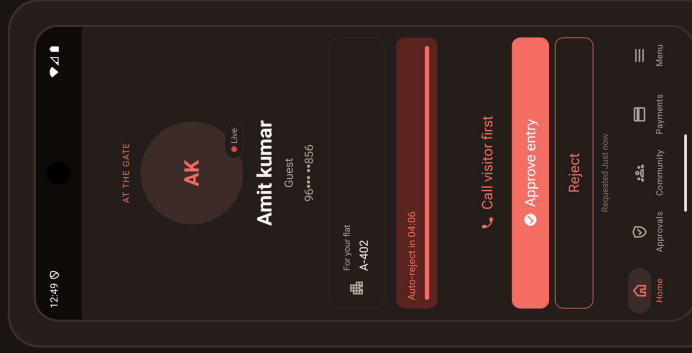

Live Analytics:

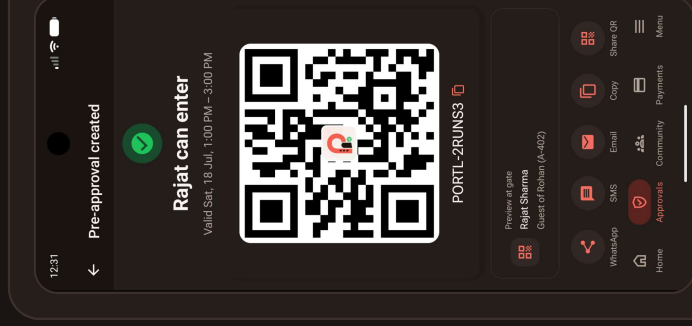

Real-time charts on visitor traffic, active maintenance, and payment rates.

Crafted with "Community Warmth" Design

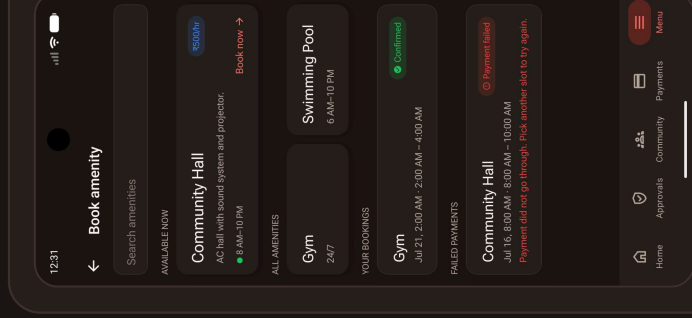

Click any screen to expand in full resolution. A rich, native UI palette blending coral accents, warm neutrals, and dark mode excellence.
